Sub.:- Environmental Clearance – Quarry project at Re Survey Nos. 284/1,279/2pt and others at Mazhuvanoor Village, Ernakulam District, Kerala– Compliance report – First half reg.

Ref.1. File No. 1446/EC3/2019/SEIAAA
Ref.2. EC Identification No. EC23B001KL188975 dt. 15-03-2023
Ref.3. Proposal No. SIA/KL/MIN/74360/2019

Respected Sir,

The Quarry (Building stone) project was accorded Environmental Clearance for 2.3337 ha. by **EC Identification No. EC23B001KL188975 dt. 15-03-2023** by State Environmental Impact Assessment Authority, Kerala. The half yearly compliance report for the period of **April 2024 – September 2024** to the specific and general conditions of the Environment Clearance order is enclosed. The mining lease for an area of 2.3337 ha was executed on 08-04-2024.

Thanking you.
Yours respectfully,

For Quarry of Eldho Kuruvilla

Eldho Kuruvilla

INTRODUCTION

The quarry project of Quarry project of **Eldho Kuruvila** at Survey No. 284/1, 279/2-2pt, 279/2pt, 284/2, 284/2-1pt, 284/2-4pt, 284/2-5 & 284/1-1pt Mazhuvanoor Village, Kunnathunad Taluk, Ernakulam District, Kerala

The quarry project was accorded with the Environmental Clearance (EC) by State Environmental Impact Assessment Authority on **15-03-2023**. As part of general condition No.48 of Environmental Clearance order, half yearly compliance report needs to be submitted by the project proponent.

The compliance report of First half to the specific conditions and general conditions of the Environmental Clearance order for the period **April 2024 – September 2024** is being submitted. The quarry project started its mining operation in 17-05-2024. The Validity of EC starts from the date on which lease is executed with Department of Mining and Geology. The mining lease was executed in 08-04-2024.

COMPLIANCE REPORT

(SPECIFIC CONDITIONS)

PART - A – SPECIFIC CONDITIONS

01	The Project Proponent shall carry out quarrying as per the approved Mining Plan and the Specific Conditions mentioned hereafter. The Project Proponent should strictly follow the Kerala Minor Mineral Concession Rules 2015 and amendments thereby.	Complied
-----------	--	-----------------

The Project Proponent is being carried out quarrying as per the approved Mining Plan and the Specific Conditions stipulated in the EC issued by SEIAA, Kerala. The Project Proponent strictly follows the Kerala Minor Mineral Concession Rules 2015 and amendments thereby.

02	The EC shall be valid from the date of execution of permit/lease from the Department of Mining and Geology. The copy of the lease order should be provided to the SELAA before commencing the mining activity.	Complied
-----------	--	-----------------

The mining lease was executed on 08-04-2024. The copy of the mining lease was submitted to SEIAA before commencing the mining activity. The copy of proceeding of mining lease and lease deed executed is attached as Annexure.

03	The EC issued will be subject to a review by SEAC after 5 years through field verification to ensure that mining is carried out sustainably as per the EC conditions.	Complied
-----------	---	-----------------

The project proponent is extracting minerals in tune with the conditions stipulated in EC. This is being monitored by Environment Monitoring Cell. The PP is aware about EC will be reviewed by SEAC after 5 years.

04	Buffer zone should be demarcated and green belt should be developed by planting trees, herbs and climbers of local species.	Complied
-----------	---	-----------------

The PP has demarcated the buffer zone and started to plant various saplings as part of developing green belt around the mine lease area.

05	Compensatory afforestation plan should be implemented from the 1st year itself and the geo coordinates and geotagged photographs of the area shall be submitted in HYCR.	Complied
-----------	--	-----------------

The PP has started compensatory afforestation in the project site as part of compensating the trees removed from mine lease area for mining activity.

06	Drainage system incorporating garland canal, silt traps, siltation pond and outflow channel connecting to a natural drain should be provided prior to the commencement of mining.	Complied
-----------	---	-----------------

The PP has developed Drainage system incorporating garland canal, silt traps, siltation pond and outflow channel connecting to a natural drain in the project area prior to the commencement of mining.

07	Garland drain, silt-traps, siltation ponds and outflow channel should be desilted periodically and geo-tagged photographs of the process should be included in the half yearly compliance report (HYCR)	Complied
-----------	---	-----------------

The Garland drain, silt-traps, siltation ponds and outflow channel desilted periodically and geo-tagged photographs of the process will be included in the half yearly compliance report (HYCR)

08	The impact of vibration due to blasting on the houses and built structures within 200m should be monitored in terms of Peak Particle Velocity and amplitude for maximum charge per delay and included in the Half Yearly Compliance Report.	Complied
-----------	---	-----------------

The impact of vibration due to blasting on the houses and built structures within 200m will be monitored in terms of Peak Particle Velocity and amplitude for maximum charge per delay and included in the Half Yearly Compliance Report.

09	CER plan should be implemented within the first 2 years and it should be operated and maintained till the mine closure plan is implemented.	Complied
-----------	---	-----------------

The PP has started to implement various CER activities in the community. The committed activities at SEIAA will be implemented within first two years of EC validity

10	Transportation of mined material should not be done during peak 8.00am to 10.00am) and afternoon (3.30pm to 5 pm)	Complied
-----------	---	-----------------

The transportation of mined materials is not done during peak 8.00am to 10.00am) and afternoon (3.30pm to 5 pm).

11	The haulage road should be widened and developed prior to the commencement of mining and it should be maintained well and dust -free with sprinkling arrangement.	Complied
-----------	---	-----------------

The PP has widened and developed the haulage road prior to the commencement of mining and the road is maintained for hassle free transportation. Stationary sprinklers are installed along the road side.

12	Adequate sanitation, waste management and rest room facilities should be provided to the workers	Complied
-----------	--	-----------------

As part of facilities for the labours, the PP has created adequate sanitary toilet block, waste management and rest rooms in the project site.

13	Adequate energy conservation measures should be implemented including solar power installations for street light and office.	Complied
-----------	--	-----------------

The PP is being in discussion with the Solar panel distributors to install solar panels as part of energy conservation.

14	The mitigation measures recommended in the EIA study for air environment, noise and vibration, water environment, land environment, ecological environment, socio- economic environment should be strictly adopted.	Complied
-----------	---	-----------------

The mitigation measures recommended in the EIA study for air environment, noise and vibration, water environment, land environment, ecological environment, socio- economic environment is being implemented.

14	Transportation of mined material should not be done during the peak hours in the forenoon (8.00am to 10.00am) and afternoon (3.30pm to 5 pm).	Complied
-----------	---	-----------------

The PP has regulated traffic from and to the mine lease area. The transportation of mined material should not be done during the peak hours in the forenoon (8.00am to 10.00am) and afternoon (3.30pm to 5 pm).

15	Environment Management Cell (EMC) should include one subject expert in environment management. The proceedings of the monthly meeting of the EMC should be submitted along with the HYCR.	Complied
-----------	---	-----------------

The PP has constituted Environment Management Cell (EMC) and include one subject expert in environment management. The meeting of the cell is regularly convening.

16	Blasting mats should be used during rock blasting to contain the blast, prevent fly rocks and suppress dust.	Complied
-----------	--	-----------------

The PP has been using blasting mat in the project site during blasting time to prevent flyrock from the mining area.

17	The commitments made by the project proponent during public hearing and in EIA/EMP should be addressed and implemented, and submit the report along with the Half Yearly Compliance Report.	Complied
-----------	---	-----------------

The commitments made by the project proponent during public hearing was included in the EIA report and these are being implemented.

18	As per OM no F.No.22-65/2017-1A.III dated 30 September 2020, under Corporate Environmental Responsibility (CER) the Project Proponent should implement the Environment Management Plan (EMP)/CER as directed by SEAC during appraisal, covering the issues to address the environmental problems in the project region, from the beginning of the project, indicating both physical and financial targets year wise. The EMP/CER shall be implemented in consultation with Local Self Govt. Institutions. A copy of the approved EMP/CER shall be made available to the concerned Panchayat for information and implementation support. The indicated cost for implementation of CER activities shall be 2% of the project cost.	Complied
-----------	--	-----------------

The PP has allocated 2% of the project cost for implementing CER activities in the community. The activities identified will be executed in consultation with Local Self Government. A copy of EMP/CER is submitted at Grama Panchayat. The committed CER activities at SEIAA will be implemented.

19	In the wake of occurrence of large scale landslides in the state, as per the information provided by the Department of Mining & Geology, it is directed to use only NONEL (Non Electrical) technology for blasting to reduce the vibration of the ground, which is one of the causative factors that triggers landslides, formation of cracks in the surrounding buildings and disturbance to human and wildlife.	Complied
-----------	---	-----------------

The Project proponent is using NONEL technology for blasting to reduce noise and vibration during blasting in the mining area. To conduct the blasting activity in the mine lease area, the PP has appointed a qualified person.

20	As per the directions contained in the OM F.No.22-34/2018-14.III dated 16 January 2020 issued by MoEF&CC, in obedience to the directions of the Hon'ble Supreme Court the Project Proponent shall, undertake re-grassing the mining area and any other area which may have been disturbed due to his mining activities and restore the land to a condition which is fit for growth of fodder, flora, fauna etc. The compliance of this direction shall be included in the Half Yearly Compliance Report which will be monitored by SEAC at regular intervals.	Complied
-----------	---	-----------------

The PP will undertake regressing / eco restoration in the mined out area and disturbed area due to the mining activity.

21	The violation of EC condition may lead to cancellation of EC and action under The Environment (Protection) Act 1986	Complied
-----------	---	-----------------

The PP is being implemented all conditions stipulated in the EC

COMPLIANCE REPORT
(GENERAL CONDITIONS)
PART B

PART – B – GENERAL CONDITIONS

01	The proponent should provide notarized affidavit (indicating the number and date of Environmental Clearance proceedings) that all the conditions stipulated in the EC shall be scrupulously followed.	Complied
-----------	---	-----------------

An assurance in the form of affidavit was already submitted to SEIAA Kerala, stating that that all the conditions stipulated in the EC shall be scrupulously followed.

02	All the statutory clearances should be obtained, as applicable, by the project proponent from the respective competent authorities including that for blasting and storage of explosives. Copies of all statutory clearances shall be submitted along with First Half Yearly Compliance Report.	Complied
-----------	---	-----------------

The PP has obtained Environmental Clearance, consent for operate from pollution control board, Explosive license, Panchayat License and lease order. The copies of the same is attached as **Annexure No 1 & 5**.

03	The project proponent should advertise in newspapers that the project has been accorded. Environmental Clearance and copies of clearance letters are available in the Office of State Environment Impact Assessment Authority (SEIAA) and on the website of the Authority at www.selaakerala.in . The advertisement should be in at least two local newspapers widely circulated in the region, one of which shall be in the vernacular language. The advertisement should be made within 10 days from the date of receipt of the Environmental Clearance letter and a copy of the same signed in all pages should be forwarded to the office of this Authority as confirmation.	Complied
-----------	--	-----------------

An advertisement in two local daily newspapers (English and Malayalam) regarding Environmental Clearance accorded to the quarry project was given within the stipulated period and the copy of the same was submitted at SEIAA Kerala. The copy of the advertisement given in two local newspapers is provided at **Annexure No.6.**

04	The proponent shall send a copy of the EC to concerned Grama Panchayat District Panchayat Municipality/Corporation Urban Local Body and also to the Local NGO, if any, from whom suggestions/representations, if any, were received while processing the proposal. The Environmental Clearance shall also be uploaded on the website of the company.	Complied
-----------	--	-----------------

A copy of the Environment Clearance letter was submitted to the Panchayat Office. The project proponent did not receive any suggestions / representation from anywhere while the processing the proposal. The EC order uploaded in the website of the company.

05	The lease area shall be fenced with barbed wire to a minimum height of 4ft around, before starting mining. All the boundary indicators (boards, markings, etc) shall be conspicuous and maintained at all times.	Complied
-----------	--	-----------------

As part of demarcation of mine lease area, the project proponent has erected barbed metal wire fencing around the mining area with height of 4 ft. This can prevent falling of animals/human being/dumping of garbage etc. in to the mine lease area.

06	The details of Environmental Clearance should be prominently displayed in a metallic board of 3 ft x 3ft with green background and yellow letters of Times New Roman font size of not less than 40. Sign board with extent of lease area and boundaries shall be depicted at the entrance of the quarry, visible to the public.	Complied
-----------	---	-----------------

The details of the Environmental Clearance are displayed in the project site. The project proponent has placed the metallic board as specified in the conditions of Environmental Clearance order

07	Explosives should be stored in magazines in isolated place specified and approved by the Explosives Department. Mats to reduce fly rock blasts to a maximum of 10 PPV should be provided	Complied
-----------	--	-----------------

As part of guidelines of competent authority and safety concern, the explosives are stored in magazine. The magazine is in an isolated place specified and approved by the explosives department.

08	Warning alarms indicating the time of blasting (to be done at specific timings) has to be arranged stipulated by Explosive Department.	Complied
-----------	--	-----------------

As per the stipulation of Explosive department, the project proponent has installed warning alarms in the quarry site. This is working properly before and after the blast.

09	Access roads to the quarry shall be black topped to contain dust emissions that may arise during transportation of materials. The transportation of minerals should be done in covered trucks to contain dust emissions.	Being complied
-----------	--	-----------------------

To reduce emission of dust through the vehicle movement, the access road from the entrance of project site to quarry is being tarred. The project proponent splashing approach road and haulage road to arrest the dust during summer season.

10	A separate Environmental Management Cell (EMC) with suitable qualified personnel should be set-up under the chairmanship of a	Complied
-----------	---	-----------------

	Senior Executive, who will report directly to the Head of the Organization. The Cell should have representative of Biodiversity Management Committee of the Panchayath and a representative of NGO, if any active in the area. The EMC should meet at least once in six months and review the activities and minutes should be a part of the compliance report.	
--	---	--

To monitor all conditions stipulated in the Environment Clearance and environment Management Plan, the project proponent has constituted an Environment Monitoring Cell. This cell concurrently monitors and evaluate the safeguard measures implemented in the project site. The minutes of the same is attached as **Annexure No.7**

11	Quarrying has to be carried out as per approved mining plan with the suggestions from SEAC incorporated and following KMMC Rules 2015 and the Amendments thereby.	Complied
-----------	---	-----------------

The project proponent is following approved mining plan with the suggestion from SEAC for the extraction of building stones.

12	The quarrying operation shall be restricted between 7 AM and 5 PM	complied
-----------	---	-----------------

The extraction of minerals and operations of quarry is restricted between 7 AM and 5 PM.

13	Rain Water Harvesting facility should be installed as per the prevailing provisions of KMBR/KPBR, unless otherwise specified. Maximum possible solar energy generation and utilization shall be ensured as an essential part of the project.	complied
-----------	--	-----------------

To conserve the rain water, the project proponent has collected storm water in a pond located in the lowest area. The stored rain water is using for irrigation purposes, watering of plants, wetting of roads.

14	Maximum depth of mining shall be as per the mining plan and as per specific direction of SEAC after field inspection. The maximum depth of mining should not be deeper than the local ground water table. No mining operations should be carried out at places having a slope greater than 45°.	Noted for compliance
-----------	---	-----------------------------

The depth of mining will not exceed beyond 10 meters from general ground level. The exploration will be as per the plan submitted before State Environment Impact Assessment Authority (SEIAA), Kerala. There will be no mining operations at places having a slope greater than 45°.

15	The height of any bench shall not exceed five meters and breadth shall not be less than the height	Being complied
-----------	--	-----------------------

As part of safety and eco friendly mining, the quarrying activity in the project is progressing by creating benches of 5m width and 5m height. The mining has started its operation from 25th of September 2024. The photograph of the benches is attached as plate.

16	The Project proponent shall ensure that no perennial or intermittent natural water course and/or water resources are obstructed due to any mining operations. Necessary safeguard measures to protect the first order streams, if any, originating from the mine lease shall be taken.	complied
-----------	--	-----------------

The project proponent ensured that no natural runoff of storm water obstructed due to any mining operations. No stream is originating from the lease area. There is no such natural water course or thodu is flowing along the project site.

17	A minimum buffer distance specified as per existing rules and statutory orders shall be maintained from the boundary of the quarry to the nearest dwelling unit or other structures, and from forest boundaries or any other ecologically sensitive and archeologically important areas or the specific distance specified by SEIAA in EC as per the recommendations of SEAC depending on specific local conditions.	Complied
-----------	--	-----------------

The norms of Kerala State Pollution Control Board regarding the distance criteria of residences, roads, rivers and worship places are adhered by the project.

18	The proponent should plant seedlings at least 5 times of the loss of trees that has occurred while clearing the land for the project and follow planting measures as suggested by SEAC. Suitable avenue trees should be planted along the sides of the approach road and internal roads and open parking areas, if any, Preference should be given to endemic native and fruit bearing species. Planting in buffer areas should be taken up beforehand. Proper upkeep and maintenance of planted seedlings shall be ensured by the project proponent	Will be complied
-----------	--	-------------------------

The project proponent has planted various saplings in the project area as a compensation of loss of trees while the project is clearing the land for mining. The project proponent is intending to plant more number of native saplings in the project site. The photograph of the compensatory afforestation is attached as plate.

19	The proponent should ensure that the vegetation in the buffer is retained, maintained and strengthened with additions of native broad leaved plants.	complied
-----------	--	-----------------

The PP does not cut the trees located at buffer and additional tree saplings are being planted in the buffer zone.

20	Eco-restoration including the closure of mine as per the progressive closure plan and final closure plan shall be done at the cost of the project proponent. This eco-restoration should follow scientific standards available for restoration, full recovery of the original vegetation and improving the resilience of different ecosystems. Overburden materials should be managed within the site and used for reclamation of mined pit as per mine closure plan/specific conditions.	Noted for compliance
----	---	-----------------------------

The eco restoration plan prepared by the project proponent will be executed in a good manner. The project proponent will plant various saplings in and around the project site. The mine closure plan will be done at the own cost of project proponent as agreed in the proposal. OB will be used within the site of project proponent.

21	At least 10 percent out of the total excavated pit area should be retained as water storage areas and the remaining area should be reclaimed with stacked dumping and overburden and planted with suitable indigenous plant species, if no other specific condition on reclamation of pit is stipulated in the EC Monitoring and management of rehabilitated areas should continue until the vegetation becomes self-sustaining.	Will be complied
----	--	-------------------------

The project proponent will retain at least 10 percent of total excavated pit as rain water storage area after closure of the mine. The remaining area will be reclaimed with stacked dumping of overburden and top soil. As part of its eco – restoration plan, the project will plant indigenous plant species that are eco – friendly on the reclaimed area.

22	Control measures on noise and vibration prescribed by KSPCB should be implemented. Quarrying activities should be limited to day time as per KSPCB guidelines/specific conditions.	complied
----	--	-----------------

The major noise generating source from the mining activity are working machinery, drilling, blasting and plying of vehicles. The following control measures has undertaken to bringing down the noise levels:-

- Proper maintenance of machinery and equipment
- The machineries like breaker and excavator has well sound proof cabin so that the machine operators can work without stress due to the sound.
- Personal protective devices i.e., ear plugs are provided to workers working in high noise areas.
- The mining activity held in day time only.
- Noise level at quarry site checked periodically.

23	Periodical monitoring of the vibration at specified location (preferably at a distance of 50 m and 100 my to be conducted and records kept for inspection. This could also form a part of the compliance reports	Will be complied
-----------	--	-------------------------

Vibration will be monitored periodically. A proper log book will be kept for inspection.

24	Speed of trucks entering or leaving the mine site is to be limited to moderate speed of 25 kmph to prevent undue noise from empty trucks.	complied
-----------	---	-----------------

Speed of the trucks is limited to 25 Kmph to reduce the noise generated from transportation.

25	Acoustic enclosures should be provided to reduce sound amplifications in addition to the provisions of green belt and hollow brick envelop for crushers so that the noise level is kept within prescribed standard limit indicated by CPCB/KSPCB.	Noted
-----------	---	--------------

Crusher is not proposed in the project site. Green belt is being developed around the mine lease area.

26	Blasting should be done in a controlled manner using NONEL technique as specified by the regulations of Petroleum and explosive safety organization (GOI) or any other concerned authorized agency. A licensed person should supervise control the blasting operations.	Complied
-----------	---	-----------------

The blasting is the crucial part of quarrying industry to explore the minor minerals. The blasting is done in controlled manner by using NONEL. All blasting activities are carrying out with the specified regulations of explosive department. Blasting and quarrying activities is under the supervision of qualified persons.

27	Measures should be taken for maintaining noise levels below 85 dBA in the work environment.	complied
-----------	---	-----------------

The main noise generating activities in the mining industries are the playing of jack hammer, breaker, vehicles and blasting operations. The project proponent has taken appropriate action to reduce the sound by employing possible measures like planting of floral species , green belt development, etc..

28	Project proponent should obtain necessary prior permission of the competent authorities for drawing requisite quantity of surface water and ground water for the project.	Noted
-----------	---	--------------

At present, the need of prior approval is not necessary to draw ground water and surface water for the project.

29	Regular monitoring of flow rates and water quality upstream and downstream of the springs and perennial nallahs flowing in and around the mine lease area shall be carried out and reported in the six monthly compliance reports to SEIAA.	Noted
-----------	---	--------------

There is no stream or springs flowing in and around to the mine lease area.

30	Catch drains and siltation ponds of appropriate size shall be constructed around the mine working, mineral and OB dumps, to prevent run off of water and flow of sediments directly into the river and other water bodies. The water so collected should be utilized for watering the mine area, roads, and for green belt development etc. The drains shall be regularly desilted and maintained properly, particularly after monsoon.	Complied
-----------	---	-----------------

The project proponent constructed effective garland drains to catch all the storm water during the time of monsoon season. These channels direct to the rain water collection pond. All sediments and silts are being settled at the bottom of the pond and only cleared water let out.

31	Regular monitoring of ground water level and quality shall be carried out around the mine area during mining operation. If any stage if it is observed that ground water table is getting depleted due to the mining activity. necessary corrective measures shall be carried out.	complied
-----------	--	-----------------

monitoring of ground water level and quality is being carried out around the mine area during mining operation regularly.

32	Garland drains and silt traps are to be provided in the slopes around the core area to channelize storm water. De-silting of Garland canal and silt traps have to be attended on a daily basis. A labour has to be specifically assigned for the purpose. The proponent shall ensure the quality of the discharging storm water as per the General Effluent Discharge Standards of CPCB.	Complied
-----------	--	-----------------

The project proponent ensure that all storm water from the mining area is flowing in to the pond created at mining area. The project proponent has created garland drains

where it is necessary in the lower slopes of the project area for storm water management.

33	In the case of any change(s) in the scope of the project, extent, quantity, process of mining technology involved or in any way affecting the environmental parameters/impacts as assessed, based on which the EC was issued, the project would require a fresh appraisal by this Authority, for which the proponent shall apply and get the approval of this Authority. In the case of transfer of ECs, the matter shall be intimated and get the approval from the Authority as per the existing norms.	Noted
-----------	---	--------------

There is no plan for the expansion of project. In case of any change(s) in the scope of the project, the proponent will apply for fresh appraisal to get the Environmental Clearance.

34	The stipulations by Statutory Authorities under different Acts and Notifications should be complied with, including the provisions of Water (Prevention and Control of Pollution) Act, 1974, the Air (Prevention and control of Pollution) Act 1981, the Environment (Protection) Act, 1986, the Public Liability (Insurance) Act, 1991 and EIA Notification, 2006.	complied
-----------	---	-----------------

The stipulated orders and directions under different act and notification including EIA notification is being scrupulously followed. A brief list of various Acts and notifications which are followed by the proponent is given below

- Kerala Minor Mineral Concession Rules, 2015.
- Mines Act, 1952
- Explosive Rules, 2008
- Kerala Panchayat Raj Act, 1994
- Water Pollution (Prevention & Control) Act, 1974
- Air Pollution (Prevention & Control) Act, 1981
- Environment Protection Act, 1986
- EIA Notification, 2006 / 2009

35	The top soil, if any, shall be temporarily stored at earmarked place (5) and used for land reclamation and plantation. The over burden (OB) generated during the mining operations shall be stacked at earmarked dump site(s) only. The maximum height of the dumps shall not exceed 8m and width 20 and overall slope of the dumps shall be maintained at 45 The OB dumps should be scientifically vegetated with suitable native species to prevent erosion and surface run off. At critical points, use of geo textile shall be undertaken for stabilization of the dump. Protective wall or gabions should be made around the dump to prevent erosion flow of sediments during rains. The entire excavated area shall be backfilled.	complied
----	--	-----------------

In order to prevent the soil erosion, the top soil and overburden are stacked in a designated place within the project site. Only the topsoil is being used for plantation purposes. Overburden will be used for landfill and to construct haulage roads in the mining area. The excess will be stored in a designated place.

36	All the mining equipment used in Mining like backhoe loaders and excavators cause pollution and hence shall be serviced regularly & maintained for their efficient functioning and for reducing pollution. Disposal of spent oil from diesel engines should be as specified under relevant Rules Regulations.	complied
----	---	-----------------

All machineries working in the proposed quarry project is regularly maintained by the PP.

37	All vehicles used for transportation and within the mines shall have PUC certificate from authorized pollution checking centre. Washing of all vehicles shall be inside the lease area.	Complied
----	---	-----------------

As part of reduce air pollution, the project proponent monitors the pollution level of all vehicles playing in the project site. This monitoring is being conducted only in authorized pollution checking center.

38	Effective safeguard measures such as regular water sprinkling shall be carried out in critical areas prone to air pollution such as haul road, loading and unloading points and transfer points and having high levels of PM ₁₀ and PM _{2.5} . Monitoring of Ambient Air Quality to be carried out based on the Notification 2009, as amended from time to time by the Central Pollution Control Board.	complied
-----------	---	-----------------

To prevent dust emissions, the project proponent has installed sprinklers in critical areas to reduce the dust emission such as loading and unloading points, haul roads and transfer points. The water spraying has been carried out regularly to arrest the dust emission. The mobile sprinkler unit properly maintains.

39	Fugitive dust emissions from all the sources should be controlled regularly. Water spraying arrangement at project site, parking area, on haul roads, loading and unloading and at transport points should be provided and properly maintained.	complied
-----------	---	-----------------

To reduce the dust emission in critical areas such as loading and unloading points, haul roads and transfer points the project proponent splashes water.

40	Corporate Environmental Responsibilities (CER) as prescribed by SEIAA/SEAC should be carried out leading to Environmental stability of the Project region. The activities carried out under CER should be a part of the half yearly compliance report. The certificates from the beneficiaries, if the CER part is completed should also be submitted to the State Environment Impact Assessment Authority (SEIAA) along with year wise expenditure.	Complied
-----------	--	-----------------

The quarry project is started in 17-05- 2024. The PP is in discussion with Grama Panchayat to finalize the CER and its execution. The expenditure incurred for CER will be reported in the HYCR.

41	The project proponent is responsible for implementing all the provisions of labour laws applicable from time to time to quarrying Mining operations. The workers on the site should be provided with on-site accommodation or facilities at a suitable boarding place, protective equipment such as ear muffs, helmet, etc.	complied
-----------	---	-----------------

The PP is being implemented labour laws applicable for mining project.

42	The proponent has to provide insurance protection to the workers in the case of existing mining or provide the affidavit in case of fresh lease before execution of mining lease.	complied
-----------	---	-----------------

The PP has provided insurance protection to the workers during its operational phase.

43	Occupational health surveillance program of the workers should be undertaken periodically to observe any contractions due to exposure to dust and take corrective measures, if needed. The report of health surveillance programme should be included in the half yearly compliance reports.	Will be complied
-----------	--	-------------------------

The project proponent will conduct an occupational health surveillance programme in association with Primary Health Center (PHC) of Kerala government for the labours working in mining area.

44	The pits in the abandoned quarries and in the mined area shall be used for activities like water harvesting, aqua culture etc. in an eco	Noted
-----------	--	--------------

	friendly manner.	
--	------------------	--

There is no abandoned pit. At the end of mine a pit will be developed which can be used as water harvesting, aqua culture etc

45	If Government land is partly or fully used for mining, the area shall be returned at the end of lease period after mine closure with separate demarcation with suitable survey marks.	Noted
-----------	---	--------------

There is no Government land involved in the proposed mining project.

46	Any accident occurring in the mined out area after the lease period due to negligence in carrying out safety measures and non-closure, will lead to suspension of all EC obtained for mining by the Proponent.	Noted
-----------	--	--------------

The PP has installed safety fencing around the mined out area to prevent any untoward incidents.

47	In case of transfer of EC the matter shall be intimated and approval from the Authority shall be obtained as per the existing norms.	Noted for compliance
-----------	--	-----------------------------

For transfer of EC , the PP will apply online Parvesh portal. At present there is no plan to transfer the EC.

48	The proponent shall submit Half Yearly Compliance Reports (1 st of June & 1 st of December) on the status of compliance of the stipulated EC conditions including results of monitored data (both in hard copies as well as by e-mail) and upload the status of compliance of the stipulated EC conditions, including results of monitored data on their website and shall update the same periodically. It shall be	being complied
-----------	--	-----------------------

	simultaneously sent to the respective Regional Office of Ministry of Environment, Forests and Climate Change, Govt. of India and also to the Office of State Environment Impact Assessment Authority (SEIAA) The proponent has to submit Environmental statement in form V of Environment (Protection) Rules 1986 to SPCB on 31 March every year.	
--	---	--

The compliance report is being submitted to the State Environmental Impact Assessment Authority, Kerala and the Regional Office of MoEF&CC, Bangalore as mail. The compliance report and the EC order is uploaded in the website of the company. The quarry project is not in operation due to lack of necessary approvals.

49	The project authorities should extend full cooperation to the officer (s) from the Regional Office of MOEF & located at Bangalore/SEAC/SPCB/CPCB/dept of Mining and Geology, while monitoring compliance of the stipulated conditions, by furnishing the requisite data/information/monitoring reports.	Will be complied
-----------	---	-------------------------

The project proponent scrupulously follows the condition stipulated in the EC order and keeping all records with a good documentation system. The project proponent will extend all possible cooperation to the officers from regional office of MoEF & CC and can produce all data/information/reports when they are asking for the same.

50	The above conditions shall prevail notwithstanding anything to the contrary, in consistent, or simplified, contained in any other permit, license on consent given by any other authority for the same project.	Noted
-----------	---	--------------

The project proponent gives priority to the conditions stipulated in the Environment clearance Order.

51	The Authority reserves the right to add additional safeguard measures subsequently, if found necessary, and to take action including revoking of the Environment Clearance under the provisions of the Environment (Protection) Act, 1986, to ensure effective implementation of the suggested safeguard measures in a time bound and satisfactory manner	Noted
----	---	--------------

The project proponent is willing to add additional safe guard measures subsequently if the authority found necessary.

52	The EC given will be withdrawn at any time if the area is declared high hazardous by the SDMA.	Noted
----	--	--------------

53	The Environmental Clearance will be subject to the final order of the courts on any pending litigation related to the land or project, in any court of law.	Noted
----	---	--------------

54	Any appeal against this Environmental Clearance shall lie with the National Green Tribunal, if preferred, within a period of 30 days as prescribed under Section 16 of the National Green Tribunal Act, 2010.	Noted
----	---	--------------

55	Concealing the factual data or submission of false fabricated data and failure to comply with any of the conditions mentioned above may result in withdrawal of this clearance and attract action under the provisions of Environment (Protection) Act, 1986.	Noted
----	---	--------------

The project proponent has produced all factual data and no data concealed during the time of appraisal.

56	The SEIAA may revoke or suspend the order, for non implementation of any of the specific or any of the above conditions. The SEIAA reserves the right to alter modify the above conditions or stipulate any further condition in the interest of environmental protection.	Noted
-----------	--	--------------

The project proponent has been implementing conditions stipulated in this Environment Clearance order. The project can execute all possible measures in the project site for the conservation of environment.

57	As per regulation no. 106(2) of metalliferous mines regulation under Mine act, the height of any bench shall not exceed six meters and breadth shall not be less than the height.	Noted
-----------	---	--------------

The height of any bench will not exceed six meters and breadth shall not be less than the height during its operational phase.

ANNEXURE

ENVIRONMENTAL CLEARANCE NO.60/Q/2023

Sri. Eldho Kuruvilla, Thombrayil House, Chelad P.O., Kothamangalam, Ernakulam, Kerala – 686 681, submitted an application for Environmental Clearance *via* PARIVESH, for the Granite Building Stone Quarry Project, for an area of 2.3337 Ha. at Block No: 29, Re. Survey Nos: 284/1, 279/2-2pt, 279/2pt, 284/2, 284/2-1pt, 284/2-4pt, 284/1-3pt, 284/2-5 & 284/1-1pt in Mazhuvannoor Village, Kunnathunadu Taluk, Ernakulam, Kerala. The project details are as follows:

EC Identification No. - EC23B001KL188975 File No. - 1446/EC3/2019/SEIAA Date of Issue EC - 15/03/2023 Page 2 of 15

SL. No.	Particulars	Details
1	Name of the Project	Granite Building Stone Quarry Project of Sri. Eldho Kuruvilla
2	Proposed Activity	Mining of Granite Building Stone
3	Name of the Sector & Schedule No. (in the ELA Notification, 2006)	Non Coal mining, Activity 1(a), Category B2
4	Name & Address of the Project Proponent	Sri. Eldho Kuruvilla, Thombrayil House, Chelad P.O., Kothamangalam, Ernakulam, Kerala – 686 681
5	Project Location	
	a) Block No.	29
	b) Re. Survey Nos.	284/1, 279/2-2pt, 279/2pt, 284/2, 284/2-1pt, 284/2-4pt, 284/1-3pt, 284/2-5& 284/1-1pt
	c) Revenue Village	Mazhuvannoor
	d) Taluk	Kunnathunadu
6	Geo Co-ordinates	Latitude 10°02'39.99" N to 10°02'45.30" N" Longitude 76°28'32.04" E to 76°28'44.07" E
	7	Extent (Hectare)
8	Project Cost	Rs.7,71,23,700/-
9	Mineable reserves	12,52,010MT
10	Water Requirement	8 KLD (2KLD for domestic consumption; 6 KLD for dust suppression).
11	Date of Field Inspection	29.12.2022

CER Details

Particulars	Amount
Promotion of Renewable Energy (Solar Panel at FHC – Mazhuvannoor)	Rs. 10,50,000/-
Mini Solar High mast street light	Rs. 6,00,000/-
Total	Rs. 16,50,000/-

EC Identification No. - EC25500716L188975

File No. - 1446/EC3/2019/SEIAA

Date of Issue EC - 15/03/2023

Page 3 of 15

2. In the 136th meeting of the SEAC, the Committee examined the proposal, verified the documents and discussed the field inspection report. The proposed life of mine is 12 years for extracting 12,52,010 MT of granite building stone with maximum extraction rate of 2,00,000 TPA as per Mining Plan. The elevation of the site vary from 104-118m above MSL and the ultimate depth of mine is 55m above MSL. The depth to watertable is given as 5m bgl in the application and 35m above MSL in the field inspection report. The nearest built structure is at 52m and nearest house is at 183m. Based on discussions, the Committee recommended EC for a period of 12 years subject to the following with certain Specific Conditions in addition to the General Conditions.

3. In the 123rd SEIAA meeting, the Authority noted that for the sustainable management of quarry operations, the approved mining plan is revised every five years till the project life of mine as per KMMC Rules, incorporating scheme of activities to be carried out for the next 5 years. Authority is of the opinion that it is essential to match these procedures and time lines followed in the department of Mining and Geology with the time lines ECs issued for the sustainable management of quarry operations and protection of environment in the project region. The Authority decided to issue Environmental Clearance initially for a period of 5 years, for the quantity mentioned in the approved mining plan, and then to extend the EC period to cover the project life of 12 years, from the date of initiation of EC (i.e., date of execution of mine lease / permit), subject to the review by SEAC at the end of five years, to verify whether the Project Proponent has violated any of the EC conditions and thereby caused any damage to the environment in the project region.

The EC is subject to General Conditions and the following Additional Specific Conditions.

1. *The Project Proponent shall carry out quarrying as per the approved Mining Plan and the Specific Conditions mentioned hereafter. The Project Proponent should strictly follow the Kerala Minor Mineral Concession Rules 2015 and amendments thereby.*
2. *The EC shall be valid from the date of execution of permit/lease from the Department of Mining and Geology. The copy of the lease order should be provided to the SEIAA before commencing the mining activity.*
3. *The EC issued will be subject to a review by SEAC after 5 years through field*

LA

verification to ensure that mining is carried out sustainably as per the EC conditions.

4. Buffer zones should be demarcated and green belt should be developed by planting trees, herbs and climbers of local species.
5. Compensatory afforestation plan should be implemented from the 1st year itself and the geo-coordinates and geo-tagged photographs of the area shall be submitted in HYCR.
6. Drainage system incorporating garland canal, silt traps, siltation pond and outflow channel connecting to the nearest natural drain should be provided prior to the commencement of mining.
7. Garland drain, silt-traps, siltation ponds and outflow channel should be desilted periodically and geo-tagged photographs of the process should be included in the HYCR.
8. Impact of vibration due to blasting on the nearest houses and built structures should be monitored in terms of peak particle velocity and amplitude for maximum charge per delay and included in the Half Yearly Compliance Report.
9. CER Plan should be implemented within the first 2 Years and it should be operated and maintained till the mine closure plan is implemented
10. Transportation of mined material should not be done during the peak hours in the forenoon (8.00am to 10.00am) and afternoon (3.30pm to 5 pm).
11. The haulage road should be widened and developed prior to the commencement of mining and it should be maintained well and dust-free with sprinkling arrangement.
12. Adequate sanitation, waste management and rest room facilities should be provided to the workers.
13. Adequate energy conservation measures proposed should be implemented including solar power installations for street light and office

LA

14. The mitigation measures recommended in the EIA study for air environment, noise and vibration, water environment, land environment, ecological environment, socio-economic environment should be strictly adopted.
15. The Environment Management Cell (EMC) should include an Environment expert and the proceedings of the monthly meeting of the Environment Management Cell (EMC) should be submitted along with the HYCR.
16. Blasting mats should be used during rock blasting to contain the blast, prevent fly rocks and suppress dust.
17. The commitments made by the Project Proponent during the Public Hearing and in EIA/EMP should be addressed and implemented, and submit the report along with the Half Yearly Compliance Reports.
18. As per OM no F.No.22-65/2017-IA.III dated 30th September 2020, under Corporate Environmental Responsibility (CER) the Project Proponent should implement the Environment Management Plan (EMP)/CER as directed by SEAC during appraisal, covering the issues to address the environmental problems in the project region, from the beginning of the project, indicating both physical and financial targets year wise. The EMP/CER shall be implemented in consultation with Local Self Govt. Institutions. A copy of the approved EMP/CER shall be made available to the concerned Panchayat for information and implementation support. The indicated cost for implementation of CER activities shall be 2% of the project cost.
19. In the wake of occurrence of large scale landslides in the state, as per the information provided by the Department of Mining & Geology, it is directed to use only NONEL (Non Electrical) technology for blasting to reduce the vibration of the ground, which is one of the causative factors that triggers landslides, formation of cracks in the surrounding buildings and disturbance to human and wildlife.
20. As per the directions contained in the OM F.No.22-34/2018-IA.III dated 16th January 2020 issued by MoEF&CC, in obedience to the directions of the Hon'ble Supreme Court the Project Proponent shall, undertake re-grassing the mining area and any other area which may have been disturbed due to his mining activities and restore the land to a condition which is fit for growth of fodder, flora, fauna etc. The

compliance of this direction shall be included in the Half Yearly Compliance Report which will be monitored by SEAC at regular intervals.

21. *The violation of EC condition may lead to cancellation of EC and action under The Environment (Protection) Act 1986.*

4. Environmental Clearance as per the EIA Notification, 2006 is hereby accorded for the Granite Building Stone Quarry Project of Sri. Eldho Kuruville, Thombrayil House, Chelad P.O., Kothamangalam, Ernakulam, Kerala – 686 681, initially for a period of 5 years, for an area of 2.3337 Ha. at Block No. 29, Re. Survey Nos: 284/1, 279/2-2pt, 279/2pt, 284/2, 284/2-1pt, 284/2-4pt, 284/1-3pt, 284/2-5 & 284/1-1pt, in Mazhuvannoor Village, Kunnathunadu Taluk, Ernakulam District, Kerala, for the quantity mentioned in the approved mining plan, from the date of execution of valid mining lease, as per SO 1807(E) dated 12.04.2022 of MoEF & CC, and then to extend the EC period to cover the project life of 12 years, from the date of initiation of original EC, subject to the review by SEAC at the end of five years, to verify whether the Project Proponent has violated any of the EC conditions and thereby caused any damage to the environment in the project region, subject to the Specific Conditions in Para 3 above, and all the environmental impact mitigation and management measures undertaken by the Project Proponent in the Form I, EMP, PFR and Mining Plan submitted to SEIAA. The assurances and clarifications given by the Project Proponent will be deemed to be a part of this Proceedings as if incorporated herein. Also the General Conditions for projects stipulated for mining (items 1 to 57), mentioned below will be applicable and have to be strictly adhered to.

5. The Environmental Clearance issued will also be subject to full and effective implementation of all the undertakings given in the Application Form, mitigation measures as assured in the Environment Management Plan and the mining features including Progressive Mine Closure Plan as submitted with the application. The above undertakings and the conditions and the undertakings in (Mining), (Blasting), (Mines Drainage), (Stacking of Mineral rejects and Disposal of waste), (Environment Management Plan) & (Progressive Mine Closure Plan) of the Mining Plan as submitted will be deemed to be part of this Proceedings as conditions as undertaken by the Project Proponent, as if incorporated herein.

LA

EC Identification No. - EC23BO01KL188975 File No. - 1446/EC3/2019/SEIAA Date of Issue EC - 15/03/2023 Page 7 of 15

6. Validity of the Environmental Clearance will be initially for a period of Five (5) years from the date of execution of valid mine lease from Mining & Geology Department as per SO 1807(E) dated 12.04.2022 of MoEF & CC, subject to earlier review of EC in case of violation or non-compliance of conditions or genuine complaints from residents within the security area of the quarry. The validity shall be extended to cover the project life of 12 years, as mentioned in Para (4).

7. Compliance with the conditions herein will be monitored by the State Environment Impact Assessment Authority or its authorised offices and also by the Regional Office of the Ministry of Environment, Forest & Climate Change, Govt. of India, Bangalore. Necessary assistance for entry and inspection should be provided by the Project Proponent and those who are engaged or entrusted by him to the staff for inspection or monitoring. Instances of violation if any shall be reported to the District Collector, Ernakulam.

8. The Half Yearly Compliance Report (HYCRs) with name of the project, EC No. and date, the period of submission with its contents, compliance report and environmental monitoring data & covering letter have to be uploaded in the Parivesh Portal as per O.M. F.No.IA3-22/1/2022-IA-III(E)-17264 dated 14.06.2022 and the website of the Project Proponent. Hardcopy of HYCRs shall not be acceptable.

9. The given address for correspondence with the authorised signatory of the project is Sri. Eldho Kuruvilla, Thombrayil House, Chelad P.O., Kothamangalam, Ernakulam, Kerala – 686 681.

GENERAL CONDITIONS

1. The proponent should provide notarized affidavit (indicating the number and date of Environmental Clearance proceedings) that all the conditions stipulated in the EC shall be scrupulously followed.
2. All the statutory clearances should be obtained, as applicable, by the project proponent from the respective competent authorities including that for blasting and storage of explosives. Copies of all statutory clearances shall be submitted along with First Half Yearly Compliance Report.

[Handwritten Signature]

3. The project proponent should advertise in newspapers that the project has been accorded Environmental Clearance and copies of clearance letters are available in the Office of State Environment Impact Assessment Authority (SEIAA) and on the website of the Authority at www.seiaakerala.in. The advertisement should be in at least two local newspapers widely circulated in the region, one of which shall be in the vernacular language. The advertisement should be made within 10 days from the date of receipt of the Environmental Clearance letter and a copy of the same signed in all pages should be forwarded to the office of this Authority as confirmation.
4. The proponent shall send a copy of the EC to concerned Grama Panchayat/ District Panchayat/ Municipality/Corporation/Urban Local Body and also to the Local NGO, if any, from whom suggestions/representations, if any, were received while processing the proposal. The Environmental Clearance shall also be uploaded on the website of the company.
5. The lease area shall be fenced with barbed wire to a minimum height of 4ft around, before starting mining. All the boundary indicators (boards, markings, etc) shall be conspicuous and maintained at all times.
6. The details of Environmental Clearance should be prominently displayed in a metallic board of 3 ft x 3 ft with green background and yellow letters of Times New Roman font size of not less than 40. Sign board with extent of lease area and boundaries shall be depicted at the entrance of the quarry, visible to the public.
7. Explosives should be stored in magazines in isolated place specified and approved by the Explosives Department. Mats to reduce fly rock blasts to a maximum of 10 PPV should be provided.
8. Warning alarms indicating the time of blasting (to be done at specific timings) has to be arranged stipulated by Explosive Department.
9. Access roads to the quarry shall be black topped to contain dust emissions that may arise during transportation of materials. The transportation of minerals should be done in covered trucks to contain dust emissions.
10. A separate Environmental Management Cell (EMC) with suitable qualified personnel should be set-up under the chairmanship of a Senior Executive, who will report directly to the Head of the Organization. The Cell should have representative of Biodiversity Management Committee of the Panchayath and a representative of NGO, if any active in the area. The EMC should meet at least once in six months and review the activities and minutes should be

a part of the compliance report.

11. Quarrying has to be carried out as per approved mining plan with the suggestions from SEAC incorporated and following KMMC rules 2015 and the Amendments thereby.
12. The quarrying operation (Blasting) shall be restricted between 7 AM and 5PM
13. Rain Water Harvesting facility should be installed as per the prevailing provisions of KMBR/KPBR, unless otherwise specified. Maximum possible solar energy generation and utilization shall be ensured as an essential part of the project.
14. Maximum depth of mining shall be as per the mining plan and as per specific direction of SEAC after field inspection. The maximum depth of mining should not be deeper than the local ground water table. No mining operations should be carried out at places having a slope greater than 45°.
15. The height of any bench shall not exceed five meters and breadth shall not be less than the height.
16. The Project proponent shall ensure that no perennial or intermittent natural water course and/or water resources are obstructed due to any mining operations. Necessary safeguard measures to protect the first order streams, if any, originating from the mine lease shall be taken.
17. A minimum buffer distance specified as per existing rules and statutory orders shall be maintained from the boundary of the quarry to the nearest dwelling unit or other structures, and from forest boundaries or any other ecologically sensitive and archeologically important areas or the specific distance specified by SEIAA in EC as per the recommendations of SEAC depending on specific local conditions.
18. The proponent should plant seedlings at least 5 times of the loss of trees that has occurred while clearing the land for the project and follow planting measures as suggested by SEAC. Suitable avenue trees should be planted along the sides of the approach road and internal roads and open parking areas, if any. Preference should be given to endemic native and fruit bearing species. Planting in buffer areas should be taken up beforehand. Proper upkeep and maintenance of planted seedlings shall be ensured by the project proponent.
19. The proponent should ensure that the vegetation in the buffer is retained, maintained and strengthened with additions of native broad leaved plants.
20. Eco-restoration including the closure of mine as per the progressive closure plan and final closure plan shall be done at the cost of the project proponent. This eco-restoration should

follow scientific standards available for restoration, full recovery of the original vegetation and improving the resilience of different ecosystems. Overburden materials should be managed within the site and used for reclamation of mined pit as per mine closure plan / specific conditions.

21. At least 10 percent out of the total excavated pit area should be retained as water storage areas and the remaining area should be reclaimed with stacked dumping and overburden and planted with suitable indigenous plant species, if no other specific condition on reclamation of pit is stipulated in the E.C. Monitoring and management of rehabilitated areas should continue until the vegetation becomes self-sustaining.
22. Control measures on noise and vibration prescribed by KSPCB should be implemented. Quarrying activities should be limited to day time as per KSPCB guidelines/specific conditions.
23. Periodical monitoring of the vibration at specified location (preferably at a distance of 50 m and 100 m) to be conducted and records kept for inspection. This could also form a part of the compliance reports.
24. Speed of trucks entering or leaving the mine site is to be limited to moderate speed of 25 kmph to prevent undue noise from empty trucks.
25. Acoustic enclosures should be provided to reduce sound amplifications in addition to the provisions of green belt and hollow brick envelop for crushers so that the noise level is kept within prescribed standard limit indicated by CPCB/KSPCB.
26. Blasting should be done in a controlled manner using NONEL technique as specified by the regulations of Petroleum and explosive safety organization (GOI) or any other concerned authorized agency. A licensed person should supervise/ control the blasting operations.
27. Measures should be taken for maintaining noise levels below 85 dBA in the work environment.
28. Project proponent should obtain necessary prior permission of the competent authorities for drawing requisite quantity of surface water and ground water for the project.
29. Regular monitoring of flow rates and water quality upstream and downstream of the springs and perennial nallahs flowing in and around the mine lease area shall be carried out and reported in the six monthly compliance reports to SEIAA.
30. Catch drains and siltation ponds of appropriate size shall be constructed around the mine working, mineral and OB dumps, to prevent run off of water and flow of sediments directly

EC Identification No. - EC2019/014/188975 File No. - 1446/EC3/2019/SEIAA Date of Issue EC - 15/03/2023 Page 11 of 15

into the river and other water bodies. The water so collected should be utilized for watering the mine area, roads, and for green belt development etc. The drains shall be regularly desilted and maintained properly, particularly after monsoon.

31. Regular monitoring of ground water level and quality shall be carried out around the mine area during mining operation. If any stage, if it is observed that ground water table is getting depleted due to the mining activity; necessary corrective measures shall be carried out.
32. Garland drains and silt traps are to be provided in the slopes around the core area to channelize storm water. De-silting of Garland canal and silt traps have to be attended on a daily basis. A labour has to be specifically assigned for the purpose. The proponent shall ensure the quality of the discharging storm water as per the General Effluent Discharge Standards of CPCB.
33. In the case of any change(s) in the scope of the project, extent, quantity, process of mining technology involved or in any way affecting the environmental parameters/impacts as assessed, based on which the E.C was issued, the project would require a fresh appraisal by this Authority, for which the proponent shall apply and get the approval of this Authority. In the case of transfer of ECs, the matter shall be intimated and get the approval from the Authority as per the existing norms.
34. The stipulations by Statutory Authorities under different Acts and Notifications should be complied with, including the provisions of Water (Prevention and Control of Pollution) Act, 1974, the Air (Prevention and control of Pollution) Act 1981, the Environment (Protection) Act, 1986, the Public Liability (Insurance) Act, 1991 and EIA Notification, 2006.
35. The top soil, if any, shall be temporarily stored at earmarked place (s) and used for land reclamation and plantation. The over burden (OB) generated during the mining operations shall be stacked at earmarked dump site(s) only. The maximum height of the dumps shall not exceed 8m and width 20m and overall slope of the dumps shall be maintained at 45⁰. The OB dumps should be scientifically vegetated with suitable native species to prevent erosion and surface run off. At critical points, use of geo textile shall be undertaken for stabilization of the dump. Protective wall or gabions should be made around the dump to prevent erosion / flow of sediments during rains. The entire excavated area shall be backfilled.
36. All the mining equipment used in Mining like backhoe loaders and excavators cause pollution and hence shall be serviced regularly & maintained for their efficient functioning and for reducing pollution. Disposal of spent oil from diesel engines should be as specified

EC Identification No. - EC23B001KL188975 File No. - 1446/EC3/2019/SEIAA Date of Issue EC - 15/03/2023 Page 12 of 15

- under relevant Rules/ Regulations.
37. All vehicles used for transportation and within the mines shall have 'PUC' certificate from authorized pollution checking centre. Washing of all vehicles shall be inside the lease area.
 38. Effective safeguard measures such as regular water sprinkling shall be carried out in critical areas prone to air pollution such as haul road, loading and unloading points and transfer points and having high levels of PM₁₀ and PM_{2.5}. Monitoring of Ambient Air Quality to be carried out based on the Notification 2009, as amended from time to time by the Central Pollution Control Board.
 39. Fugitive dust emissions from all the sources should be controlled regularly. Water spraying arrangement at project site, parking area, on haul roads, loading and unloading and at transport points should be provided and properly maintained.
 40. Corporate Environmental Responsibilities (CER) as prescribed by SEIAA/SEAC should be carried out leading to Environmental stability of the Project region. The activities carried out under CER should be a part of the half yearly compliance report. The certificates from the beneficiaries, if the CER part is completed should also be submitted to the State Environment Impact Assessment Authority (SEIAA) along with year wise expenditure.
 41. The project proponent is responsible for implementing all the provisions of labour laws applicable from time to time to quarrying /Mining operations. The workers on the site should be provided with on-site accommodation or facilities at a suitable boarding place, protective equipment such as ear muffs, helmet, etc.
 42. The proponent has to provide insurance protection to the workers in the case of existing mining or provide the affidavit in case of fresh lease before execution of mining lease.
 43. Occupational health surveillance program of the workers should be undertaken periodically to observe any contractions due to exposure to dust and take corrective measures, if needed. The report of health surveillance programme should be included in the half yearly compliance reports.
 44. The pits in the abandoned quarries and in the mined area shall be used for activities like water harvesting, aqua culture etc. in an eco friendly manner.
 45. If Government land is partly or fully used for mining, the area shall be returned at the end of lease period after mine closure with separate demarcation with suitable survey marks.

46. Any accident occurring in the mined out area after the lease period due to negligence in carrying out safety measures and non-closure, will lead to suspension of all EC obtained for mining by the Proponent.
47. In case of transfer of EC the matter shall be intimated and approval from the Authority shall be obtained as per the existing norms.
48. The proponent shall submit Half Yearly Compliance Reports (1st of June & 1st of December) on the status of compliance of the stipulated EC conditions including results of monitored data (both in hard copies as well as by e-mail) and upload the status of compliance of the stipulated EC conditions, including results of monitored data on their website and shall update the same periodically. It shall be simultaneously sent to the respective Regional Office of Ministry of Environment, Forests and Climate Change, Govt. of India and also to the Office of State Environment Impact Assessment Authority (SEIAA). The proponent has to submit Environmental statement in form V of Environment (Protection) Rules 1986 to SPCB on 31st March every year.
49. The project authorities should extend full cooperation to the officer (s) from the Regional Office of MOEF & CC located at Bangalore/SEAC/SPCB/CPCB/dept of Mining and Geology, while monitoring compliance of the stipulated conditions, by furnishing the requisite data/information/monitoring reports.
50. The above conditions shall prevail notwithstanding anything to the contrary, in consistent, or simplified, contained in any other permit, license on consent given by any other authority for the same project.
51. The Authority reserves the right to add additional safeguard measures subsequently, if found necessary, and to take action including revoking of the Environment Clearance under the provisions of the Environment (Protection) Act, 1986, to ensure effective implementation of the suggested safeguard measures in a time bound and satisfactory manner.
52. The EC given will be withdrawn at any time if the area is declared high hazardous by the SDMA.
53. The Environmental Clearance will be subject to the final order of the courts on any pending litigation related to the land or project, in any court of law.
54. Any appeal against this Environmental Clearance shall lie with the National Green Tribunal, if preferred, within a period of 30 days as prescribed under Section 16 of the National Green Tribunal Act, 2010.

LA

55. Concealing the factual data or submission of false/fabricated data and failure to comply with any of the conditions mentioned above may result in withdrawal of this clearance and attract action under the provisions of Environment (Protection) Act, 1986.
56. The SEIAA may revoke or suspend the order, for non implementation of any of the specific or any of the above conditions. The SEIAA reserves the right to alter/modify the above conditions or stipulate any further condition in the interest of environmental protection.
57. As per regulation no. 106(2) of metalliferous mines regulation under Mine act, the height of any bench shall not exceed six meters and breadth shall not be less than the height.

- a board displaying the timing of the blasting.
- g. It has been decided to position the explosive magazine in an isolated place meeting the conditions of P&SO.
 - h. Discussed about the removal of the overburden and topsoil of the quarrying area and compensatory afforestation process. It has been decided that afforestation process should start on immediate basis. Mr. Thampirenan, member of the Committee is entrusted with the responsibility of carrying out compensatory afforestation done with indigenous fruits trees and reporting the same to the Environment Management Cell. He is also made responsible for taking geo-tagged photographs of the compensatory afforestation.
 - i. Infrastructure needs to be created for periodic cleaning of gasland canal, slottops, siltation tank and outflow canal. A check list for periodic cleaning needs to be created and monitoring system needs to be established. Mr. Ramshikumar is entrusted with the responsibility of making necessary infrastructure for the cleaning and for the formation of a cleaning team and monitoring the cleaning process.
 - ~~It has already formed an EMC for the cluster involving other quarries which are located within 500 meters distance from the quarry of Eldhokuruvilla.~~
 - J. It has already formed an EMC for the cluster involving other quarries which are located within 500 meters distance from the quarry of Eldhokuruvilla.
 - K. Chairman informed the Committee about the findings of the Blasting study conducted in the previous lease area of CGPA, adjacent Quarry in the Management of Eldhokuruvilla by CSIR during the previous lease. He informed that the peak particle velocity and amplitude for maximum charge per delay at the boundary of the quarry is well within the limit. He said that the details of the study was submitted to SEIAA for further information. It has been decided that once the blasting
